Research & Policy: Technical brief writing, capacity building programme design, stakeholder briefings, Policy research & synthesis

IT Operations: IT Infrastructure Management, SOPs & Policy Design, Information Security, Role-Based Access Control (RBAC), Data Protection & Compliance, Network Administration

WORK EXPERIENCE

African Continental Free Trade Area (AfCFTA) Secretariat,
Program Assistant – NTM Division (DTIG)

Accra
February 2026 – August 2026

- Provide technical documentation and follow-up support to AfCFTA Directorates, including the units on NTBs, SPS, and TBT, ensuring organized records and policy actions tracking.
- Actively supports the division in identifying, categorizing, and monitoring Non-Tariff Barriers (NTBs), Technical Barriers to Trade (TBTs), and Sanitary and Phytosanitary (SPS) measures to ensure strict alignment with Annexes 5, 6, and 7 of the AfCFTA Agreement.
- Facilitate daily operations of the AfCFTA Online Mechanism for Reporting, Monitoring, and Eliminating NTBs by managing critical communications between National Focal Points and the Secretariat.
- Draft strategic memos, concept notes, and comprehensive work programs for high-level division meetings focused on Non-Tariff Measures (NTMs) policy frameworks.
- Conduct specialized research and develop technical briefs, concept notes, and status reports in collaboration with international partners such as ARSO, UNCTAD, and TradeMark Africa.

- Coordinate complex itineraries and logistics for capacity-building trainings and workshops involving participants from across African Member states and international partner organizations, working from multiple time zones.

African Continental Free Trade Area (AfCFTA) Secretariat,
Program Assistant – Medical Unit (AHRMD)

Accra
July 2025 – January 2026

- Developed structured medical planning documents that improved visibility into health program outcomes and operational priorities.
- Successfully coordinated multi-partner health initiatives, ensuring programmes were delivered on schedule and aligned with organizational objectives.
- Acted as the central liaison for external medical partners, enhancing service delivery reliability for staff.
- Led the rollout of targeted wellness programs that supported a proactive health culture within the organization.
- Developed standardized communication templates that improved consistency in internal reporting and coordination between units and senior management.
- Streamlined the medical claims verification process, reducing processing delays and improving turnaround time for staff reimbursements.

Samasoft Technologies,
Project Manager

Accra
Jan 2025 – July 2025

- Led end-to-end planning and delivery of digital transformation projects across the education sector, managing scope, schedule, and budget using Agile (Scrum/Kanban) and Waterfall methodologies.
- Oversaw development and deployment of technology platforms including Learning Management Systems (LMS), e-Voting platforms, and Bulk SMS solutions; coordinating cross-functional technical teams, designers, and client stakeholders.
- Managed external vendor relationships and strategic procurement, ensuring efficient budget utilization and timely delivery of technology solutions aligned with client business needs.
- Designed and delivered cybersecurity awareness and system training programmes for staff and clients, improving digital literacy, data protection compliance, and secure platform adoption.
- Translated complex client business requirements into structured technology solutions, demonstrating ability to bridge business needs with IT delivery.

Geocom Company Limited
I.T. Operations Officer

Accra
Apr 2021- Dec 2024

- Managed end-to-end IT operations across the organization, serving as the primary lead for infrastructure governance, system security, and technology service delivery, supporting survey and construction operations.
- Redesigned and implemented IT Standard Operating Procedures (SOPs) covering user access management, data backup, document management, and system governance, improving workflow efficiency and reducing operational risk.

- Administered role-based access control (RBAC) and implemented encrypted data storage solutions using Google Cloud Storage with Identity and Access Management (IAM) policies, ensuring information security practices aligned with ISO27001 principles.
- Monitored and audited IT systems for adherence to institutional security protocols and data protection standards, identifying vulnerabilities and driving continuous improvement in security posture.
- Oversaw procurement, configuration, and auditing of IT equipment and assets, ensuring all hardware and software met performance standards for GIS and survey software environments, demonstrating strong vendor and asset management capability.
- Led centralized task tracking and document management using ClickUp and Google Workspace, implementing automated workflows to streamline administrative and operational processes.
- Supervised maintenance and upgrade of local area networks (LAN) and hardware systems, ensuring 24/7 operational availability for business-critical project environments.
- Coordinated digitization and cloud migration of physical archives to Google Drive and private backup systems, improving secure remote access for technical consultants and stakeholders.
- Collaborated with survey and construction departments to troubleshoot specialized technical issues, minimizing project downtime and improving field-to-office communication and service delivery.
- Supported business systems coordination by liaising with finance and operations teams on technology-enabled process improvements, gaining exposure to ERP-adjacent business management workflows.

Ghacem Limited

Accra

HR Assistant

Sep 2018- Dec 2019

- Assisted in recruitment processes, and preparation of reports.
- Coordinated staff meetings, training sessions, and company events to ensure smooth execution.
- Supported procurement activities and maintained accurate office supplies inventory tracking.
- Managed scheduling, correspondence, and documentation for senior management.
- Streamlined office coordination processes, improving efficiency in daily operations across departments.
